

## Sexual health clinic (SHC) surveillance of STIs: October-December 2012

Quarterly case counts in participating SHCs by disease, January 2011 to December 2012

No cases of chancroid, granuloma inguinale or lymphogranuloma venereum were reported during the last quarter

Note: Data was not received from the Ashburton SHC for January 2012. This clinic sees only a small number of STI cases month; in 2011, an average of 2.3 STI cases were seen each month. From Quarter 2 2012, Hawke's Bay are reporting only cases in their secondary sexual health clinics. Prior to this, cases seen under contract in the primary care setting were also included.
